Proceedings of SimBuild Conference 2006
2nd Conference of IBPSA-USA
Cambridge, Massachusetts
August 2–4, 2006

Table of Contents

Experience Testing EnergyPlus with the IEA HVAC BESTEST E300-E545 Series and IEA HVAC BESTEST Fuel-Fired Furnace Series 1
Michael J. Witte; Robert H. Henninger; Drury B. Crawley

Using EnergyPlus for California Title-24 Compliance Calculations 9
Joe Huang; Norman Bourassa; Fred Buhl; Ender Erdem; Rob Hitchcock

Simulation Model for Energy Performance and User Comfort Evaluation of Atrium Buildings 17
Özgür Göçer; Aslıhan Tavil; Ertan Özkan

Simulation of Double-Skin Facades for Hot and Humid Climate 25
Matthias Haase; Alex Amato

A Library of HVAC Component Models for Use in Automated Diagnostics 34
Peng Xu; Philip Haves; Dimitri Curtil

Automated Multivariate Optimization Tool for Energy Analysis 42
Peter G. Ellis; Brent T. Griffith; Nicholas Long; Paul Torcellini; Drury Crawley

A Multiple-Building Optimization Scheme Based on Statistical Building-Load Models 49
Leslie K. Norford; Hai-Yun Xing

Implementation of an Earth Tube System into EnergyPlus Program 58
Kwang Ho Lee; Richard K. Strand

The Simulation of a Renewable-Energy-Powered Hydrogen-Based Residential Electricity System 67
Ian Beausoleil-Morrison Maria Mottillo Alex Ferguson Hajo Ribberink Libing Yang Kamel Haddad

Methodology for Analyzing the Technical Potential for Energy Performance in the U.S. Commercial Buildings Sector with Detailed Energy Modeling 75
Brent Griffith; Drury Crawley

A Scenario Analysis of Retrofit Strategies for Reducing Energy Consumption in Norwegian Office Buildings 82
Lisa A. Engblom; Leon R. Glicksman; Leslie K. Norford

Evaluation of Demand Shifting Strategies with Thermal Mass in Two Large Commercial Buildings 91
Peng Xu

Development of Methods for Determining Demand-Limiting Setpoint Trajectories in Commercial Buildings Using Short-Term Data Analysis 99
Kyoung-ho Lee; James Braun

Evaluation of Methods for Determining Demand-Limiting Setpoint Trajectories in Commercial Buildings Using Short-Term Data Analysis 107
Kyoung-ho Lee; James Braun

A Statistics-Based Method for Hourly Solar Radiation Estimation 115
Huang Zhizhong; Pan Yiqun

A Calibrated Computer Model for the Thermal Simulation of Courtyard Microclimates 121
Amr Bagneid; Jeffrey Haberl

Performance of High-Performance Glazing in IECC Compliant Building Simulation Model 129
Jaya Mukhopadhyay; Jeff S. Haberl

Evaluating Fenestration Products for Zero-Energy Buildings: Issues for Discussion 140
Dariush Arasteh; Charlie Curcija; Joe Huang; Charlie Huizenga; Christian Kohler
Energy Simulation of a Double Skin Facade: A Process Using CFD and EnergyPlus 145
Alexandra (Aleka) Pappas; Zhiqiang (John) Zhai
A Model for Naturally Ventilated Cavities on the Exteriors of Opaque Building Thermal Envelopes 153
Brent Griffith
Analysis Process for Designing Double Skin Facades and Associated Case Study 160
Ian Doebber; Maurya McClintock
Building as a Learning Tool: Facility Management and Simulation in the Classroom 168
Steve Morlino; Rodney Williams; Edward Brzezowski
Using Simulation Tools in a University Laboratory Course: Assessing the Performance of a Health-Care Center in Lusaka, Zambia 174
Leslie K. Norford
The Energy Performance of the Cold-Formed Steel-Frame and Wood-Frame Houses Developed for Thailand 183
Prechaya Mahattanatawe; Charunpat Puvanant; Darunee Mongkolsawat
Low Energy Cooling Technologies for Sub-Tropical/Warm Humid Climate Building Systems 191
Ashfaque Ahmed Chowdhury; Mohammad Golam Rasul; Mohammad Masud Kamal Khan
An Analysis of Building Envelope Upgrades for Residential Energy Efficiency in Hot and Humid Climates 200
Mini Malhotra; Jeff Haberl
Whole-House Energy Analysis Procedures for Existing Homes 210
Robert Hendron
Validation of a Multi-Zone Model with Integrated Energy Equation and Impact of Thermal Mass Modeling Methodology 220
Jinchao Yuan; Leon R. Glicksman
Advances on the Coupling Between a Commercial CFD Package and a Component-Based Simulation Program 231
Diego Arias
Radiant Slab Cooling: A Case Study of Building Energy Performance 238
Zhen Tian; James A. Love
Radiant Slab Cooling: A Field Study of Occupant Thermal Comfort 245
Zhen Tian; James A. Love
The Application of Building Energy Simulation and Calibration in Two High-Rise Commercial Buildings in Shanghai 252
Yiqun Pan; Zhizhong Huang; Gang Wu; Chen Chen
Modelica Versus TRNSYS - A Comparison Between an Equation-Based and a Procedural Modeling Language for Building Energy Simulation 262
Michael Wetter; Christoph Haugstetter
The MIT Design Advisor - A Fast, Simple Tool for Energy Efficient Building Design 270
Bryan Urban; Leon Glicksman
Qualitative Archi Bond Graphs for Building Simulation of People Behaviour and Energy Variation 277
Jerry Jen-Hung Tsai; John S. Gero

Using Video for Analyzing Daylight Simulation Tools 285
Daniel C. Glaser; F. Whitney Smith; Barb Cutler
IFC to CONTAM Translator 293
Mangesh Basarkar; Muthusamy Swami
Natural Ventilation Measurements and Simulation at Two Milwaukee Nature Centers 302
David E. Bradley; D. Michael Utzinger
