

Twelfth National Conference of IBPSA-USA

May 20-22, 2026

Minneapolis, Minnesota

INTERNATIONAL BUILDING PERFORMANCE SIMULATION ASSOCIATION - USA

SimBuild

Proceedings of SimBuild 2026

From Models to Reality: Bridging Simulation
and Operational Performance

Editors

Andreas Berres

Cary Faulkner

Richard Fenrich

Alexandra Rempel

Weimin Wang

Yunyang Ye

Table of Contents

High-Fidelity Building Emulator for Integrated Comfort and Energy Analysis using EnergyPlus and Radiance <i>Yu Tammie; Wang Taoning; Gehbauer Christoph</i>	1
Simulating the Impact of Photovoltaic Cell Temperature on Electricity Production under Various Global Climates <i>Wu Chengde</i>	9
Optimized Control for Integrated Photovoltaic and Water Distribution System Applications <i>Kurtz Nathan (12); Ganesh Viswanathan; Marucci Leah; Zuo Wangda (13)</i>	20
Experimental Demonstration of a Self-Powered Dynamic Façade Using Thermoelectric-PCM Integration <i>Mohajerzadeh Zia; Elmi Mohammad; Nozariasbmarz Amin; Wang Julian; Azari Rahman</i>	31
Wet-Bulb Temperature Performance Maps for Chiller-Water Side Economizer Plants: Guiding Multi-Sequence Control Strategies <i>Ganesh Viswanathan; Li Hongjun; Ho Julia; Zuo Wangda (12)</i>	39
Development of a Hybrid Simulation Platform for Training and Evaluation of Reinforcement Learning Algorithms for Commercial Buildings <i>Guo Fangzhou; Shen Yang; Ham Sang woo; Kim Donghun</i>	48
A Framework for Generating and Simulating Prototype Energy Models of U.S. Data Centers at National Scale <i>Li Hang; Chowdhury Shovan; Singh Vivek; New Joshua</i>	56
Numerical Simulation of Heat Transfer in an Un-Conditioned Underground Building: Spatiotemporal Variation of Indoor Surface Heat Transfer Coefficient <i>Sena Sanjaya; Goyal Rahul; Tyagi S. K.</i>	65
Economizer Scoring Framework for AHU Performance Assessment <i>Yu Min Gyung Schad Alexander Johnson Stephanie Goddard James Yoder Tim Duan Xiaoli Salisbury Timothy</i>	80
Profiling Building Demand Flexibility for Out-of-Scenario Transferability Using Frequency-Domain Decomposition <i>Xie Kexin; Rovas Dimitrios; Tang Rui</i>	89
Development of Residential Archetypes to Predict Indoor Temperatures of Vulnerable Homes <i>Passe Ulrike; Sharifi Kimia</i>	100
A Physiologically-Informed Visual Field Method for Assessing Space View Quality <i>Chu Yingnan; Samuelson Holly; Song Yehao</i>	110
Phase Change Material Integration in Building Energy Simulation Using OpenStudio Measures and Python Library <i>Uddin Meftah; Khanna Sanjeev</i>	122
Experience in Motion: Scalable, Sequential Urban Microclimates Simulations for Visual and Thermal Comfort <i>Wang Yiqing; Zhu Lujia; Ang Yu Qian</i>	132
Solar-Hydrogen Building Skins: Validating Simulations through Experimentation <i>Zhang Jingshi; Azari Rahman; Poerschke Ute</i>	142

From Data to Dialogue: A Visual Framework for Interpreting fTMY Future Weather Data in Climate-Responsive Design	150
<i>Li Jiewei; Hoffman Elaine</i>	
Evaluating the Impact of Indoor Hydroponic Systems on Students' Well-being in High School Classrooms	160
<i>Ying Albert; Arsano Alpha</i>	
An Impulse-based Fluid Dynamics for Fast Indoor Airflow Simulation	171
<i>Lee Woohyoung; Faulkner Cary; Zuo Wangda (13)</i>	
More Than a Label: Modeling Modern Heat Pump Performance Beyond Seasonal Efficiency Ratings	182
<i>Kruis Neal; Oliver Nathan</i>	
Towards Open-Source Simulation Models for Flexible and Self-Sufficient Energy Hubs	193
<i>Davari Malihe; Fitó Jaume; Ramousse Julien; Hinkelman Kathryn</i>	
Simulation Tool For The Configuration And Control Design Of Central Plant Heat Recovery Heat Pump Retrofits	205
<i>Excell Lauren (12); Ham Sang woo; Kim Donghun</i>	
Overheating in Residential Buildings in the United States	216
<i>Hampo Chima; Schinasi Leah H.; Hoque Simi</i>	
Validating the Electric Dream: Comparison of Modeled and Measured Performance of a High-Efficiency, All-Electric Residential Retrofit in Los Angeles, California	227
<i>Konis Kyle</i>	
System Identification for a Building Thermal Model from Observational Data in the Presence of Unmeasured Disturbances	239
<i>Ham Sang woo; Kim Donghun</i>	
Eppy-LLM: An Agentic Workflow for Language-Driven Building Energy Modeling And Optimization Using EnergyPlus	251
<i>Zhou Huiwen; Zhang Liang</i>	
Eplusout Model Context Protocol (MCP): Large Language Model (LLM)-Enabled Simulation Results	263
<i>Sweeney Michael; Meyer Ryan; Goel Supriya</i>	
LLM-Informed Efficient Bayesian Calibration of Building Energy Simulation Models under Limited Data	275
<i>Bai Yangxi; Wang Endong</i>	
Control-Oriented Prototype Energy Model for Data Centers	287
<i>Li Hongjun; Huang Sen; Zuo Wangda (13)</i>	
Reduced Order Building Hydronic Models in Ambient Temperature Thermal Energy Networks for Improved Computational Efficiency	296
<i>Ho Julia; Wang Jing; Jin Xin; Zuo Wangda (12)</i>	
Applying Frequency Domain Methods for Calculating Outdoor Surface Temperatures.	308
<i>Beckett Owen; Owens Sam; Acred Andy</i>	
Audit Template: A Modular, Interoperable Web-Based Platform for Building Energy Audits and Retrofit Planning	316
<i>Goel Supriya; Foucher Simon; Eswaran Sudha; Mo Kefei; Barajas Juan; Chhabra Jayati</i>	
Principal Variate Selection Approach for LSTM Building Load Forecasting	327
<i>Yu Huawei; Ye Yunyang; Xu Jiuyi; Shi Yangming</i>	

Updating Plug Loads and Operational Schedules for California Energy Code Compliance <i>Contoyannis Dimitri Achong Gypsy Athalye Rahul Vonder Kuhlen Demian Datey Aboli Gowri Krishnan (5)</i>	339
A Comprehensive Review of Meta-Learning Applications in Building Domain <i>Sui Jiyuan; Adhikari Rosina; Sitzabee William; Zuo Wangda (12)</i>	349
Specialized Weather Data Files for Evaluating Thermal Safety and Grid Reliability Applications <i>Singh Manan; Franconi Ellen; Nambiar Chitra</i>	361
Combining Generative Modeling and Advanced Control for Building Scenario Generation <i>Wald Dylan; El Kontar Rawad; Vaidhynathan Deepthi</i>	373
Development of New Occupancy Schedules and Occupant-Centric Control Strategy for Residential Buildings <i>Kim Ryunhee; Faulkner Cary; Chen Yan; Ye Yunyang</i>	381
Exploring the Interplay Between Window Design and External Views on Window-Opening Preferences in Educational Settings <i>Momenaei Atousa; Rempel Alexandra; Rockcastle Siobhan</i>	389
Calendars of the City: Deterministic Schedule Libraries to Enhance UBEM Load Duration Forecasts <i>Li Chengxuan; Dogan Timur</i>	401
Quantitative Model of Building Energy Performance due to Wind-Induced Envelope Damage <i>Alhayik Imad; Sharston Ryan; Subgranon Arthriya; Ou Ge</i>	413
Co-design Optimal Sizing and Control Framework to Balance Cost and Resilience <i>Flores Garcia Juan Diego; Liu Boming; Huang Sen; Zuo Wangda</i>	425
Parametric Energy and Cost Optimization for Courthouse Portfolios in California <i>Brannon Benjamin; Brink Holly; Kiyono Arata</i>	435
Balancing Energy Efficiency and Overheating Risks: Optimal Retrofit Pathways for Baltimore Rowhouses <i>Adhikari Rosina; Gandara Genevieve I.; Sui Jiyuan; Zuo Wangda (13)</i>	444
Towards a Robust Approach for Simulating Thermal Resilience in Architectural Design: A literature review and benchmarking test in all US climate zones <i>Liang Ruiyang; Dogan Timur</i>	454
Explainable AI and Machine Learning for Transparent Building Energy Benchmarking and Retrofit Decisions <i>Jain Milan; Goel Supriya; Lei Xuechen</i>	466
Evaluating Prompt Engineering in Large Language Models (LLMs) for Transforming Occupant Behavior Modeling <i>Li Shundong; Ma Nan</i>	478
Forecasting space heating flexibility: Comparing Measured Dwelling Cool-Down Rates with Dynamic Thermal Simulation <i>Townsend Jordan; Crawley Jenny; Beizae Arash; Allinson David</i>	490
Improving Thermal Resilience And Energy Efficiency Using Cool Building Envelope Materials <i>Amiri Ahmad Shoaib (12); Jandaghian Zahra; Gaur Abhishek</i>	501
Scalable, Modular Resilience Hubs <i>Villa Daniel L.; Quiroz Jimmy E.; Mammoli Andrea; Farm Kyle Elama</i>	515

A High Throughput Framework for Large Scale Building Energy Simulation: From Real-Time Alerts to AI-Ready Surrogates	527
<i>Muralidharan Vishal; Passe Ulrike; Ganapathysubramanian Baskar</i>	
Probabilistic Modeling Approach for Estimating Rent Impacts of Energy Retrofits	538
<i>Jain Milan; Nambiar Chitra; Rackley Adrienne; Meyer Ryan</i>	
Thermal Performance Optimization of Battery Energy Storage Enclosure for South Pole Applications	550
<i>Kim Ji-Hyun Jeannie; Zeng Zhaoyun; Muehleisen Ralph T.; Bender Amy N.</i>	
Adding Timeseries Acceptance Criteria to ASHRAE Standard 140	559
<i>McDowell Timothy; Muehleisen Ralph; Glazer Jason</i>	
Digital Twins for Building Energy Modeling: Balancing Level of Detail, Data Resolution, and Model Accuracy	570
<i>Chatzivasileiadi Aikaterini Demir Dilsiz Aysegul Lannon Simon Denzer Anthony</i>	
<i>Macy Luke BK Satish Perisoglou Emmanouil Jafar Rawan Haddad Kamal Qaed Abeer</i>	
A Systematic Approach for a Typological Analysis of African Residential Building Stock Across Multiple Climates	583
<i>Arsano Alpha Yacob; Beyene Ermias Tessema; Molnar Elisabeth</i>	
Novel pair-wise Comparison Methodology for the Validation of Analytical Building Performance Modelling	596
<i>Arsano Alpha Yacob; Chu Colin</i>	
A Case Study on Staging Mixed-Age Computer Room Air Conditioning Systems Considering Performance Degradation	606
<i>Maloney Michael; Ganesh Viswanathan; Zuo Wangda (12)</i>	
Exploring a Julia-based Toolchain for HVAC Innovation: Simulation-based Optimization Case Study of a Dedicated Outdoor Air System with a Desiccant Wheel	618
<i>Song Ruizhi; Liu Mingzhe; Yang Zhiyao; O'Neill Zheng</i>	
EBuild AI: A Retrieval-Augmented Framework for Generating Global, Simulation-Ready Urban Building Datasets	629
<i>Almaian Maryam; Elkontar Rawad; Alkubaisi Noof; Kastner Patrick</i>	
AI-Based Metric for Building and Grid Reliability Assessment via Input Propagation and Stress Testing	638
<i>El Kontar Rawad Almaian Maryam Clarke Ardelia Kastner Patrick Ferrall-Wolf Isa</i>	
<i>Tuttle Robin King Ryan</i>	
Bridging Intent and Iteration: An Open Framework for LLM-Directed BEM Optimization at Scale	650
<i>ElSayed Mo; Shultz Justin</i>	
Integration and Implementation Verification of Air-to-Water Heat Pump Models for California's Title 24 Compliance Software	662
<i>Dabbagh Mohammad Mirian Nasim Shadd Eric Arent John Athalye Rahul</i>	
<i>Vonder Kuhlen Demian Kapur Nikhil Wichert RJ</i>	
Enhancing EnergyPlus to Model the Time Independent Energy Recovery (TIER) System for Load Management and Code Compliance	673
<i>Xu Yujie; Wang Shaojie; Sultan Sara; Gowri Krishnan; Boyce Bryan; Hong Tianzhen</i>	
Net Zero as Climate Resilience: Rethinking Net Zero Energy Building Performance Under Future Climate Change	683
<i>Renner Riley; Ross Wyatt; Webb Amanda</i>	

Framework for Modeling 3D-Printed Concrete Construction to Assess Energy Efficiency and Backup Power Trade-offs in a Mixed-Use, New Construction Neighborhood Development	694
<i>Ramaraj Sugirdhalakshmi El Kontar Rawad Dunham Hallie Seward Margaux Polly Ben Pedit-Smith Selina</i>	
DARA: A Life Cycle Assessment Tool for Early-Stage Small-Scale Residential Design Decisions	706
<i>Savage Chris Moroseos Teresa Miwatani-Minter Bearach Meek Chris Burpee Heather Sami Vikram</i>	
BEMEval-Doc2Schema: Benchmarking Large Language Models for Structured Data Extraction in Building Energy Modeling	718
<i>Jia Yiyuan; Fu Xiaoqin; Zhang Liang</i>	
Deep Learning Methods for Building Energy Benchmarking of Commercial Buildings	730
<i>Chintala Rohit; Chinde Venkatesh; Kim Janghyun; Xiong Jie; Chapin Alex; Ball Brian</i>	
Validating Daylight, View, and Privacy Metrics through In-Situ Experiments in NYC Residential Units	740
<i>Kim Jaeha; Kral Katharina; Dogan Timur</i>	
Efficient Residential Energy Model Calibration for Field Audits: Targeted Parameter Optimization Using OpenStudio and GenOpt	752
<i>Abdalla Ahmed Saber; Supriyatno Alessandro; Abdelsalam Mohamed; Pudleiner David</i>	
Simulation-Based Validation of An Open-Source, Scalable Framework for Building Energy Management in Small and Medium-Sized Commercial Buildings	764
<i>Chung Jihoon; Huang Sen; Lian Jamie; Katipamula Srinivas; Lutes Robert</i>	
Generalized and Localized AI Models for Urban Energy Characterization: A Comparative Analysis for UBE inputs Inference	776
<i>El Kontar Rawad; Almaian Maryam; Wald Dylan; Vaidhynathan Deepthi; King Ryan</i>	
BESTOpt: A Modular, Physics-Informed Machine Learning based Building Modeling, Control and Optimization Framework	786
<i>Jiang Zixin Song Ruizhi Li Guowen Zhang Yuhang O'Neill Zheng Wang Xuezheng Goldfeder Judah Dong Bing</i>	
Passively Survivable Apartments: Retrofit Strategies for Multifamily Housing in Los Angeles During Extreme Heat Events	798
<i>Knop Jennifer; Konis Kyle; Susman Gideon; Anderton Frances</i>	
A Whole-Building Demonstration of Differentiable Predictive Control with Stochastic Occupant Behavior	810
<i>Poplawski Michael; Ha Juwan; Dehwah Ammar H.A; Devaprasad Karthikeya</i>	
Optimization and Prediction of the performance of Spatial Configuration in a Housing Created Under Permitted Development Rights	822
<i>Khalil Amany Macha Bhargav Azli Noorfazlenawati Davies Michael Oikonomou Eleni Clifford Ben Mavrogianni Anna Raslan Rokia</i>	
Developing a New Set of Prototypical Models for Office Buildings in California	834
<i>Yousefi Fatemeh; Athalye Rahul</i>	
Digitalizing Building Control Deployment for Retrofits: A Case Study on Demand-Flexible Control Sequences	844
<i>Pritoni Marco Prakash Anand Paul Lazlo Huang Weiping Kukharchuk Roman Dawson-Haggerty Stephen Sulzer Matthias Wetter Michael</i>	

Year-by-Year Dynamic Building Energy Assessment with Future Climate Projections Capturing Extremes and Fluctuations	856
<i>Salehi Parisa; Karatas Aslihan</i>	
Sun and Stone in the Windy City: New Estimates of Direct Solar Heating Potential in Greater Chicago	865
<i>Rempel Alexandra; Momenaei Atousa; Rempel Alan; Mishra Sandipan</i>
